You could download my latest English and Japanese resumes both of Word and PDF versions from my GitHub; You had successfully downloaded my resumes, please contact me.

FAQ:

1. Goals:

   - My skills and career as a Data Scientist:

     - Lead Data Scientist;

     - Data Science PM(Project Manager), etc.

2. Workable date: Same day available (retired already)

3. Annual income:

   - Now: 4 million yen(年収400万円);

   - Hope: 5 million yen or more(年収500万円以上)

4. Important points to join the job:

   - 1)Job description: Whether it is Data Science, whether I can utilize my skills, whether it is directly linked to my skill improvement, etc.

   - 2)Work style flexibility: Can you work remotely, have a lot of vacations, etc.

   - 3)Annual income level: I hope 5 million yen or more.

5. My skills:

Contact & FAQ:

- Advantages:
  - Development Experience on is more than 4 years including Kaggle:
    - ✧ Statistical Models such as Time Series Analysis;
    - ✧ ML(Machine Learning);
    - ✧ SQL from DB(Database);
  - Familiarity with the theory of Statistics and Econometrics

- Weaknesses:
  - The theory of ML(Machine Learning);
  - English (especially Conversation)

- Remarks:
  - I did the whole development process independently;
  - So, my Management Experience was only 6 months.

6. Reasons for finding a job and changing jobs

- 1)Seraku
  - I certainly gained experience in programming: Python and R and IT tools: SQL and BI, as well as in Machine Learning and Time Series Analysis;
  - After that, I offered to move to the in-house development department, but I was rejected;
  - As a result, I decided to change jobs because I wanted to go to the upstream process of Data Science;

- 2)EDIX
  - EDIX promised to leave me the Lead Data Scientist from the beginning and go to the upstream process of Data Science in the job vacancies and interview explanations;
  - In fact, I worked as a Technical Advisor of Data Science as SES(System Engineering Service);
  - However, I realized that SES could not develop and propose Data Science Projects on its own, so I decided to change jobs again.
